## MONTHLY RAINFALL FORECAST STUDY IN SOUTHEASTERN BRAZIL USING MULTI-LAYER PERCEPTRON (MLP) NEURAL NETWORKS

Cleber Souza Corrêa, Diogo Machado Custodio, Haroldo de Campos Velho

## **ABSTRACT**

This work uses the MLP neural network technique to make monthly rainfall forecast estimates for Guarulhos airport in southeastern Brazil using a time series of approximately 70 years. Neural network structures with two or more hidden layers showed a better result, minimizing the prediction error.
